

eGiving[®] Center[™]

Why Should I Have an eGiving[®] Center In My Church?

Today, it is hard to find someone who carries a checkbook or large amounts of cash. Not only is it much more convenient to pay for almost everything with a credit card or by direct debit (like utility bills) from our banking accounts, it is safer too. If you lose a credit card, you can usually limit your losses. Not so with stolen cash - it's gone forever.

Think about how much money you have in your pocket right now. Most of us use credit cards for about everything.

So, what do you do if you want to receive a special offering for a sudden **need that has arisen? How many of your congregation won't be able to participate because they didn't come prepared?**

Eliminate the need for your congregation to carry cash or checks and increase your contribution potential by providing a *Fast, Easy, and Secure* way to contribute using a debit or credit card.

Capable of displaying informational prompts in English, Spanish, French, and German, the self-service eGiving[®] Center is perfect for multi-cultural congregations.

Available in both a free-standing floor kiosk or a portable, counter-top model, the eGiving[®] Center can be configured to meet your specific installation or usage needs.

Contact us today for more information and learn how to put a self-service eGiving[®] Center (SGC) to work for your church!

SECURITY BY MERCURY AND MAGTEK

To ensure that card holder data is protected, PCM Management has partnered with one of the payment card industries premier transaction processors. Mercury® offers Payment Card Industry (PCI) compliant transaction processing.

MagTek's **MagneSafe™ IntelliHead** card readers used on the self-service eGiving® Center are equipped with an encryption key known only to Mercury®. So, when a card is swiped, the data is encrypted by the reader and transmitted to Mercury® for processing over a secure connection—**that's like double encryption**. To maintain the highest security standards, the SGC does not store or retain the card data beyond the time required for actually processing the transaction.

Your security is important to us!

How Can I Put The eGiving® Center to Work in My Church?

Give us a call, send us an email, or fill out the contact form on our website. It will only take few minutes to put together a plan to ship an eGiving® Center to you, set up a credit card processing account, and provide you with all of the information and tools that you need to make the program a success in your church.
